DETAILED ACTION

Notice to Applicant(s)

1. This office action is responsive to the amendment filed on 4/21/05. As per request, claims 1, 6, 8-9, 20, 23, and 25-26 have been amended. Thus, claims 1-27 are pending.

Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1-5, 7, and 21, are rejected under 35 U.S.C. 103(a) as being unpatentable over Ikuma (4,364,448) in view of Takata (5,226,501).

As per claim 1, Ikuma discloses an electronic control device for controlling a controlled device installed on a bicycle, wherein the control device comprises: a programmed computer that controls the control device (see columns 1-2, lines 55-18; and columns 5-6, lines 42-18). Ikuma does not disclose a reset circuit that receives information related to a traveling condition of the bicycle and provides a reset signal to the computer in response to the occurrence of a predetermined traveling condition. However, Takata discloses a reset circuit that receives information related to a traveling condition of the bicycle and provides a reset signal to the computer in response to the occurrence of a predetermined traveling condition and without dependence on the operation of the control device (see column 4, lines 3-25). It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the teach of Ikuma by combining a reset circuit that receives information related to a traveling

Application/Control Number: 10/707,176

Art Unit: 3661

condition of the bicycle and provides a reset signal to the computer in response to the occurrence of a predetermined traveling condition for changing the state of the electric power to drive the vehicle.

As per claim 2, Ikuma discloses the traveling condition comprises bicycle speed (see column 2, lines 19-32).

As per claim 3, Takata discloses the predetermined traveling condition comprises the bicycle speed being below a predetermined (see column 4, lines 3-25).

As per claims 4-5, Ikuma discloses the traveling condition comprises a signal output by an alternating current generator, the traveling condition comprises a frequency output by the alternating current generator (see column 7, lines 20-59; and columns 10-11, lines 1-28).

As per claim 7, Ikuma discloses the traveling condition comprises a voltage output by an alternating current generator (see columns 15-16, lines 66-34).

As per claim 21, Takata discloses the reset circuit comprises a reset signal output circuit, and a reset activating circuit that activates the reset signal output circuit in response to the occurrence of the predetermined traveling condition (see column 4, lines 3-25).

4. Claims 22, and 24, are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 6, 8-20, 23, 25, and 26-27, are allowable.

Remarks

- 5. Applicant's argument filed on 4/21/05 has been fully considered. Upon updated search, the new ground of rejection has been set forth as above.
- 6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dalena Tran whose telephone number is 571-272-6968. The examiner can normally be reached on M-F 6:30 AM-4:00 PM), off every other Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas Black can be reached on 571-272-6956. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
